AUDIO

REAL Innovation

ARREL Audio Overview

ARREL Audio products, conceived for the professional audio engineer and musician, combines high reliability, rugged design, audio quality, versatility and ease of use. They are perfect for recording every kind of music in all the situations where the maximum sound quality is needed especially for actual digital recording 24bit/192kHz environments where superior performance is required.

They are based on the use of the latest circuit topologies, characterized by very low distortion, ultra-low noise and very wide frequency response. ARREL Audio systems are designed and hand-assembled in Italy with minimum cabling to obtain the best mechanical performances and the minimum degradation of the audio signal.

ARREL audio devices are designed utilizing mostly through-hole technology which provides better performances when compared to surface mount technology.

Moreover, no custom electronic components are used in ARREL Audio units.

Our aim is to transfer technology emerging from research in advanced innovative products.

ER-150-EXT Power Supply Extender

The **ARREL Audio ER-150 Power Supply Extender** is the natural extension of the ER-150 Power Supply System. By using this module the ER-150 can be extended to another Eurorack system maintaining the possibility of an overall control of the absorbed current on the three Eurorack power supply rails.

The ER-150-EXT is connected to the power out bus of the ER-150 by a special low resistance cable iER-150-EXT-CAB in order to minimize the voltage loss maintaining a high quality of the power supply.
